

# Project log for Vision Project

Shreyas Rajesh

## Monday, 22nd June 2020

- Created a virtual environment for the project.
- Read about git created a repo and hosted a github repository.
- Committed a readme as well as the package requirements file onto the repository. Yet to add Deva Uncle
- Further looked at higher level packages ImageAI and FastAi, FastAI has an excellent course detailing the use of their package would be a good idea to have a look at that and experiment.
- The plan for the next day is to get into Fastai and work on building a simple classifier.
